GO-BELT® INSTALLATION & PROJECT REFERENCE LIST

1991–2026

Detailed historical record • Gold and Platinum operations • Current project status

About this reference list

This document separates T.K.O Engineering's detailed Go-Belt® installation and project history from the main Company Profile. Historical entries are retained from the company's recorded installation register. More recent records are shown with status wording so that installed equipment is not confused with equipment that has only been supplied or delivered.
